 FUSION

## Education is our passion

It is a fact that great IT systems and support in schools significantly improve results and opportunities for students, whether they are learning in the classroom or at home.

With IT frustrations and interruptions removed, your students and staff can focus, with a wider variety of tools that support better educational outcomes.

Over 100 schools currently excel in our environments, experiencing exciting new ways to incorporate technology into their curriculum.

Together, we are building something great.

# We tech, you teach

## Tech training for confident teachers

We partner with Using Technology Better, to provide our schools the tech PLD they need to confidently teach with new digital tools.

With a PLD program tailored for your staff, they'll feel comfortable in their lesson plans and will love using technology to enhance student learning.

Get in touch to find out how we can help your school access the available MoE PLD funds.

## Engaged, digitally confident classrooms

The smart choice for any school selecting a trusted ICT partner, Fusion are dedicated to building accessible digital learning environments for accelerated student development.

With on-the-ground technicians and IT management covered, your staff can be focused on their priorities to teach and build great learners.

Fusion schools receive comprehensive, always available tech support, under a fixed price model for peace of mind.

## Your tech concerns sorted. What this looks like:

- 1** An initial audit of your current environment and requirements gives us an understanding of your digital needs. We provide you with an outline of the year to come
- 2** A fixed monthly cost, that allows you to budget for the upcoming year without any surprises
- 3** A regular on-site engineer, dedicated to your school's IT needs. We act on your behalf with external providers (ie N4L) to keep you focused on your main goals.
- 4** A wider team of highly skilled engineers, to ensure you are always supported and experiencing an easy digital environment.
- 5** Regular reviews and communication, with a planning session in term four to prepare for your next years goals, and PLD needs

# Aotearoa's future tech stars

## The Fusion Intern Programme

The Fusion Intern programme was developed to help our schools provide better education on the tech industry and a gateway to the available careers.

Available in every Fusion supported secondary school, we work with your staff to provide education and opportunities for students to get into tech pathways.

We've built a highly competent team at Fusion through the programme, with 60% of our education team employed from internships.

Today, we've employed 60% of Fusion education engineers through the programme, learning, earning and adding value to each school they work with.
